| :---: | :---: | :---: | :---: |
| Place Value | - count in multiples of $6,7,9,25$ and 1000 <br> - count backwards through zero to include negative numbers <br> - recognise the place value of each digit in a four-digit number (thousands, hundreds, tens, and ones) <br> - order and compare numbers beyond 1000 <br> - identify, represent and estimate numbers using different representations <br> - round any number to the nearest 10,100 or 1000 <br> - solve number and practical problems that involve all of the above and with increasingly large positive numbers <br> - read Roman numerals to 100 (I to C) and know that over time, the numeral system changed to include the concept of zero and place value. | - read, write, order and compare numbers to at least 1000000 and determine the value of each digit <br> - count forwards or backwards in steps of powers of 10 for any given number up to 1 000000 <br> - interpret negative numbers in context, count forwards and backwards with positive and negative whole numbers, including through zero <br> - round any number up to 1000000 to the nearest $10,100,1000,10000$ and 100000 <br> - solve number problems and practical problems that involve all of the above <br> - Read Roman numerals to 1000 (M) and recognise years written in Roman numerals. | - read, write, order and compare numbers up to 10000000 and determine the value of each digit <br> - round any whole number to a required degree of accuracy <br> - use negative numbers in context, and calculate intervals across zero <br> - solve number problems and practical problems that involve all of the above. |
| Addition and Subtraction | - add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate <br> - estimate and use inverse operations to check answers to a calculation <br> - solve addition and subtraction twostep problems in contexts, deciding which operations and methods to use and why. <br> - Find a 1000 more or less than a given number | - add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction) <br> - add and subtract numbers mentally with increasingly large numbers <br> - use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy <br> - solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why. | - multiply multi-digit numbers up to 4 digits by a twodigit whole number using the formal written method of long multiplication <br> - divide numbers up to 4 digits by a two-digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context <br> - divide numbers up to 4 digits by a two-digit number using the formal written method of short division where appropriate, interpreting remainders according to the context |

| Multiplication and Division | - recall multiplication and division facts for multiplication tables up to $12 \times 12$ <br> - use place value, known and derived facts to multiply and divide mentally, including: multiplying by 0 and 1 ; dividing by 1 ; multiplying together three numbers <br> - recognise and use factor pairs and commutativity in mental calculations <br> - multiply two-digit and three-digit numbers by a one-digit number using formal written layout <br> - solve problems involving multiplying and adding, including using the distributive law to multiply two digit numbers by one digit, integer scaling problems and harder correspondence problems such as $n$ objects are connected to m objects. | - identify multiples and factors, including finding all factor pairs of a number, and common factors of 2 numbers <br> - know and use the vocabulary of prime numbers, prime factors and composite (non-prime) numbers <br> - establish whether a number up to 100 is prime and recall prime numbers up to 19 <br> - multiply numbers up to 4 digits by a one- or twodigit number using a formal written method, including long multiplication for two-digit numbers <br> - multiply and divide numbers mentally, drawing upon known facts <br> - divide numbers up to 4 digits by a one-digit number using the formal written method of short division and interpret remainders appropriately for the context <br> - multiply and divide whole numbers and those involving decimals by 10, 100 and 1,000 <br> - recognise and use square numbers and cube numbers, and the notation for squared $\left({ }^{2}\right)$ and cubed ( ${ }^{3}$ ) <br> - solve problems involving multiplication and division, including using their knowledge of factors and multiples, squares and cubes <br> - solve problems involving addition, subtraction, multiplication and division and a combination of these, including understanding the meaning of the equals sign <br> - solve problems involving multiplication and division, including scaling by simple fractions and problems involving simple rates | - perform mental calculations, including with mixed operations and large numbers <br> - identify common factors, common multiples and prime numbers <br> - use their knowledge of the order of operations to carry out calculations involving the four operations <br> - solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why <br> - solve problems involving addition, subtraction, multiplication and division <br> - use estimation to check answers to calculations and determine, in the context of a problem, an appropriate degree of accuracy. |
| :---: | :---: | :---: | :---: |
| Time | - Convert between different units of measure, e.g. hour to minute. <br> - Read, write and convert time between analogue and digital 12 and 24 hour clocks. | - Solve problems involving converting between units of time <br> - Read timetables and solve a range of problems about journeys and durations. | - Solve timetable problems <br> - Solve problems involving converting between units of time. <br> - Read timetables and solve a range of problems about journeys and durations. <br> - Solve problems about different time zones. |

|  | - Solve problems involving converting from hours to minutes; minutes to seconds; years to months; weeks to days. <br> - Read the time to the nearest minute. |  |  |
| :---: | :---: | :---: | :---: |
| Shape, Space, Symmetry Angles | - compare and classify geometric shapes, including quadrilaterals and triangles, based on their properties and sizes <br> - identify acute and obtuse angles and compare and order angles up to two right angles by size <br> - identify lines of symmetry in 2-D shapes presented in different orientations <br> - complete a simple symmetric figure with respect to a specific line of symmetry | - identify 3-D shapes, including cubes and other cuboids, from 2-D representations <br> - know angles are measured in degrees: estimate and compare acute, obtuse and reflex angles <br> - draw given angles, and measure them in degrees ( ${ }^{\circ}$ ) <br> - identify: <br> - use the properties of rectangles to deduce related facts and find missing lengths and angles <br> - Distinguish between regular and irregular polygons based on reasoning about equal sides and angles. | - draw 2-D shapes using given dimensions and angles <br> - recognise, describe and build simple 3-D shapes including making nets <br> - compare and classify geometric shapes based on their properties and sizes and find unknown angles in any triangles, quadrilaterals, and regular polygons <br> - illustrate and name parts of circle, including radius, diameter and circumference and know that the diameter is twice the radius <br> - recognise angles where they meet at a point, are on a straight line, or are vertically opposite, and find missing angles. |
| Fractions Decimals and Percentages | - recognise and show, using diagrams, families of common equivalent fractions <br> - count up and down in hundredths; recognise that hundredths arise when dividing an object by one hundred and dividing tenths by ten. <br> - solve problems involving increasingly harder fractions to calculate quantities, and fractions to divide quantities, including nonunit fractions where the answer is a whole number <br> - add and subtract fractions with the same denominator | - compare and order fractions whose denominators are all multiples of the same number <br> - identify, name and write equivalent fractions of a given fraction, represented visually, including tenths and hundredths <br> - recognise mixed numbers and improper fractions and convert from one form to the other and write mathematical statements $>1$ as a mixed number[for example, ${ }^{2} / 5+^{4} / 5=^{6} / 5=1^{1} / 5$ ] <br> - add and subtract fractions with the same denominator and denominators that are multiples of the same number <br> - multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams | - use common factors to simplify fractions; use common multiples to express fractions in the same denomination <br> - compare and order fractions, including fractions $>1$ <br> - add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions <br> - multiply simple pairs of proper fractions, writing the answer in its simplest form [for example, $\frac{1}{4} \times \frac{1}{2}=1 / 8$ ] <br> - divide proper fractions by whole numbers [for example, $1 / 3 \div 2=1 / 6$ ] <br> - associate a fraction with division and calculate decimal fraction equivalents [for example, 0.375 ] for a simple fraction [for example, $3 / 8$ ] |

|  | - recognise and write decimal equivalents of any number of tenths or hundredths <br> - recognise and write decimal equivalents to $\frac{1}{4}, \frac{1}{2}, \frac{3}{4}$ <br> - find the effect of dividing a oneor two-digit number by 10 and 100, identifying the !speralue of the digits in the answer as ones, tenths and hundredths <br> - round decimals with one decimal place to the nearest whole number <br> - compare numbers with the same number of decimal places up to two decimal places <br> - solve simple measure and money problems involving fractions and decimals to two decimal places. | - read and write decimal numbers as fractions [for example, $0.71=71 / 100$ ] <br> - recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents <br> - round decimals with two decimal places to the nearest whole number and to one decimal place <br> - read, write, order and compare numbers with up to three decimal places <br> - solve problems involving number up to three decimal places <br> - recognise the per cent symbol (\%) and understand that per cent relates to 'number of parts per hundred', and write percentages as a fraction with denominator 100, and as a decimal <br> - solve problems which require knowing percentage and decimal equivalents of $1 / 2,1 / 4,1 / 5,2 / 5$ and those fractions with a denominator of a multiple of 10 or 25 . | - identify the value of each digit in numbers given to three decimal places and multiply and divide numbers by 10,100 and 1000 giving answers up to three decimal places <br> - multiply one-digit numbers with up to two decimal places by whole numbers <br> - use written division methods in cases where the answer has up to two decimal places. <br> - solve problems which require answers to be rounded to specified degrees of accuracy <br> - recall and use equivalences between simple fractions, decimals and percentages including in different contexts. |
| :---: | :---: | :---: | :---: |
| Calculations and Algebra | - Perform the four operations using formal methods with numbers of increasing size. <br> - Apply more than one method to a multi-step written problem. <br> - Know and use the vocabulary of prime numbers, prime factors and composite (non-prime) numbers. <br> - Establish whether a number up to 100 is prime and recall prime numbers up to 19. <br> - Recall and use multiplication and division facts for multiplication tables up to $12 \times 12$. <br> - Use place value, known and derived facts to multiply and divide mentally, | - Perform the four operations using formal methods with numbers of increasing size. <br> - Apply more than one method to a multi-step written problem. <br> - Know and use the vocabulary of prime numbers, prime factors and composite (non-prime) numbers. <br> - Establish whether a number up to 100 is prime and recall prime numbers up to 19. <br> - Multiply and divide numbers mentally drawing upon known facts. <br> - Multiply and divide whole numbers by 10, 100 and 1000. <br> - Multiply numbers up to 4 digits by a one or two digit number using a formal written method, including long multiplication for 2 digit numbers. | - Know and use the vocabulary of prime numbers, prime factors and composite (non-prime) numbers. <br> - Establish whether a number up to 100 is prime and recall prime numbers up to 19 . <br> - use simple formulae <br> - generate and describe linear number sequences <br> - express missing number problems algebraically <br> - find pairs of numbers that satisfy number sentences involving two unknowns <br> - enumerate possibilities of combinations of two variables |

|  | including: multiplying by 0 and 1; dividing by 1 ; multiplying together three numbers. <br> - Recognise and use factor pairs and commutatively in mental calculations. <br> - Multiply two digit and three digit numbers by a one digit number using formal written layout. <br> - Solve problems involving multiplying and adding, including using the distributive law to multiply two digit numbers by one digit, integer scaling problems and harder correspondence problems such as n objects are connected to m objects. | - Divide numbers up to 4 digits by a one digit number using the formal written method of short division and interpret remainders appropriately for the context. <br> - Identify multiples and factors, including finding all factor pairs of a number, and common factors of two numbers. <br> - Recognise and use square numbers and cube numbers and the notation for squared (2) and cubed (3) <br> - Solve problems involving multiplication and division including using their knowledge of factors and multiples, squares and cubes. <br> - Solve problems involving addition and subtraction, multiplication and division and a combination of these, including |  |
| :---: | :---: | :---: | :---: |
| Measurement: Conversions | - Convert between different units of measure eg kilometre to metre. <br> - Solve simple measure and money problems involving fractions and decimals to two decimal places. <br> - Measure and calculate the perimeter of a rectilinear figure (including squares) in cm and m | - Convert between different units of metric measure (for example, km and $\mathrm{m} ; \mathrm{cm}$ and m ; cm and $\mathrm{mm} ; \mathrm{g}$ and kg ; l and ml ). <br> - Calculate and compare the area of rectangles (including squares), and including using standard units, cm2, m2 estimate the area of irregular shapes. <br> - Estimate volume (for example using 1 cm 3 blocks to build cuboids (including cubes) and capacity (for example, using water). <br> - Use all four operations to solve problems involving measure. | - Solve problems involving the calculation and conversion of units of measure, using decimal notation up to three decimal places where appropriate. <br> - Use, read, write and convert between standard units, converting measurements of length, from a smaller unit of measure to a larger unit, and vice versa, using decimal notation to up to 3dp. <br> - Understand and use approximate equivalences between metric units and common imperial units such as inches, pounds and pints. <br> - Convert between miles and kilometres. |
| Measurement: <br> Area, <br> Perimeter and Volume | - Estimate, compare and calculate different measures, including money in pounds and pence. <br> - Measure and calculate the perimeter of a rectilinear figure (including squares) in centimetres and metres. <br> - Find the area of rectilinear shapes by counting squares. | - Measure and calculate the perimeter of composite rectilinear shapes in cm and m . <br> - Calculate and compare the area of rectangles (including squares), and including using standard units, cm2, m2 estimate the area of irregular shapes. <br> - Estimate volume (for example using 1 cm 3 blocks to build cuboids (including cubes) and capacity (for example, using water)). | - Calculate the area of parallelograms and triangles and trapeziums. <br> - Recognise that shapes with the same areas can have different perimeters and vice versa. <br> - Recognise when it is possible to use formulae for area and volume of shapes. <br> - Calculate, estimate and compare volume of cubes and cuboids using standard units, including $\mathrm{cm} 3, \mathrm{~m} 3$ and extending to other units ( $\mathrm{mm} 3, \mathrm{~km} 3$ ). |

To be used in conjunction with White Rose Maths Hub Mastery Planning and Assessment

| Position and <br> Direction | Describe positions on a 2D grid as <br> coordinates in the first quadrant. <br> Describe movements between positions as <br> translations of a given unit to the left/ <br> right and up/ down. <br> Plot specified points and draw sides to <br> complete a given polygon. | Identify, describe and represent the position of a <br> shape following a reflection or translation, using the <br> appropriate language, and know that the shape has <br> not changed. | Describe positions on the full coordinate grid (all four <br> quadrants). <br> Draw and translate simple shapes on the coordinate <br> plane, and reflect them in the axis. |
| :--- | :--- | :--- | :--- |
|  | Interpret and present discrete and <br> continuous data using appropriate graphical <br> methods, including bar charts and time <br> graphs. <br> Solve comparison, sum and difference <br> problems using information presented in <br> bar charts, pictograms, tables and other <br> graphs. | Solve comparison, sum and difference problems using <br> information presented in a line graph. <br> Complete, read and interpret information in tables <br> including timetables. | Interpret and construct pie charts and line graphs and <br> use these to solve problems. |
|  | Calculate the mean as an average. |  |  |
